*** Even if you accept the binomial expansion as being correct, the j=0 term is 1, not (1−p)^k.

Jack ***

Had you notice that YOU ARE COMPLETELY WRONG?

___(a + b)^k = kC0 * a ^ k * b^0 + &
_____= a ^ k +...

___a = 1 − p , b = p

Not 1, NEVER EVER!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

(when you attend High School did you failed the lesson to go to skate? − You slipped majestically, nose to the ground).

(cft. what I wrote on Jun. 28, 2006 5:27 AM).

BE MORE CAREFUL.
