So now you go crying to momma, what a baby and a bully. Can't take a dose of your own medicine!!

Well, as a matter of fact, I was acting as a MODERATOR of the sci.stat.math group, against violators who resort to use of obscene epithets in response to some straightforward comments about his ERRORS.

My response was generated by your statement:

when Nag didn't even know which way to look in the first place, but smart-donkey enough to insist of looking no other ways.

^^^^^^^^^^^^^^

And what was YOUR response? Why did you snipped it yourself this time?

and your irrelevant and incorrect responses. Let google investigate. I am sure they will be interested in the content and volume of your posts.

Google would not have the time nor the expertise nor the reason to investigate the CONTENT of my posts which violates no usage agreements. Google is well aware of the VOLUME of my posts, which

Re: Multinomial approximation to Poisson ??

is NOT a violation of any posting rules.

Sorry you are ignorant about such matters.

Unlike you, I am not hiding behind an anonymous address.

That's the typical comment of a "Clueless Newbie". In your case, it is particularly amusing, because you think Naga1010 is your real name and that is mattered?

Why don't you  
post your name, position and employer and then let us see what your employer will have to say about all your postings.

Best  
Nag

Why don't you buy a CLUE. Readers of this group is laughing so hard at your cluelessness that some of them probably had to clean their keyboard and monitor for the uncontrollable spit of coffee from their mouths when they saw your line.

Next time, you should warn them first, by a warning, such as

NEWBIE ALERT!!

PS: Do me a favor and keep off my threads. No one appointed you monitor.

What have you done to serve me doing you a favor?

I had already kept off "your thread" by telling you that you have to do it on your own on your silly condition (3) that you want to do it ONLY YOUR WAY.

Then you started your gratuitous replies which I merely showed that you were WRONG.

As for monitor? EVERYONE in this newsgroup has the right and responsibility to be a MODERATOR of the newsgroup, according to the tradition of USENET. That's just one other CLUE you were missing.

Re: Multinomial approximation to Poisson ??

Re: Multinomial approximation to Poisson ??

If you want to see if ANYONE wants to help you solve your problem on your ridiculous terms, after your inability to ask the question and errors made in your description -- just SHUT UP and wait for your help.

Continuing to make your noise is not going to help you one bit.
