JACK TOMSKY: an HISTORIAL of nonsense

Only an absolute ignorant in the Hypotheses Test matter thinks the following

- 1) Your assertion that Hypotheses tests and Court Trials are the same thing,
- 2) Your belief that the Null Hypotheses could be find being really true (or the alternative one),
- 3) The belief that the null hypotheses are true equalities, not the statement that is not sufficient evidence the concerned parameters are different. They are CONCEPTS not merely term generalizations, not a Byzantine *nickpick* but really just within the realm of the matter to which none is allowed to hesitate. Note that in a) the persecutor?s identity switch, if detected, we prove H_0 , a *forbidden* situation in Hypotheses TestIs surely on his matters Jack Tomsky should rethink urgently.
