Charles, let's go back yet again. I drive a Seat. Not a bad car, it shows me the same scenery as a Mercedes but not as comfortably. If I would have been a cabdriver, it's a point of discussion, now it ain't. I'll stick with the Seat.

At another level, don't look merely at the car for a good drive, look especially at the driver. The amateurs I know do marvellous things with their toys, unlike most professionals.

Rene.
