-

I just ran across two nicely written articles about using DSLR's and speedlights published by Rainer Schubert. Yet another reason to learn German ;-)

1) "Experiences with a DSLR for photomicrography using a speedlight" at <http://www.weihenstephan.org/~joachenk/digi-slr.pdf>

2) "The TTL-flash inside the base of the microscope" at <http://www.weihenstephan.org/~joachenk/ttl-blitz.pdf>

Happy reading,

Gregor
