Hello to everyone,

I am planning to sell my Zeiss Universal for IL (I got a Reichert Polvar, which IMHO is much better)

It is equipped for DIC (IL), BF and POL with the BF-POL illuminator (with the two mirrors for better polarization) and the corresponding Epiplan lenses 4-16-40-80 with their DIC prisms plus the IL 100W Halogen illumination.

In case you might be interested in this instrument – it will be offered at an attractive price – please email me directly at [georg@xxxxxxx](mailto:georg@xxxxxxx) and I email you some photographs and the complete list of all equipment details plus their condition.

The location of the instrument is Vienna/Austria and can be shipped worldwide – if you pay for packaging and shipment and prepay for the instrument (bank transfer, Paypal...)

Thanks and regards  
Georg Nyman
