Hello

I have a microscope whith "photar 1:2,5/25" on one of its objectives.  
What does this mean ? It is not a zoom objective but i can change the  
diafram.  
Who can help ?

It's an objective made by Leitz/Leica and intended for macrophotography. I'm  
sure a websearch will turn up anything you would like to know on the lens.

Y.
