=====
When:
October 15, 2008
Tuesday at 8:30 AM Pacific time
Duration: About 1 hour, plus questions and answers

Pre-register (required) at: <http://www.magworldwide.com/education>

=====
October 15, 2008
Wednesday at 08:30 AM Pacific time

Using Media Cybernetics' IQbase image database, our presenter will highlight and demonstrate the benefits of using a dedicated image database to store, manage and extract knowledge from your images. If you spend time searching for images, wish you had an easy way to share your images, or long for a better way to manage your images, this free online seminar will show you how a dedicated image management system can improve efficiency and collaboration within your organization.

Subjects covered:

- How image management software can increase productivity and efficiency.
- The value of being able to search using image meta data.
- Streamlining your workflow with easy click and choose tools for archiving, querying, data display, customizing and reporting.
- Collaboration within your organization and with outside partners by sharing image data through your network or via the Internet.
- Instantly finding images and related data with drag and drop
